WORK EXPERIENCE

Senior Software Engineer

05/2021 to Present

Topia

Dublin, Ireland

- Implemented and improved new and existing components in Topia UI design systems (i.e component library) based on designs and requirements.
- Implemented several mobility applications by myself from scratch using React, TS, and Topia design systems which are used today by thousands of users.
- Created multiple MVP products using React, UI libraries, and CSS which went successfully as part of POC in the client demo.
- Set up development system including VCS (Git). JIRA to support the remote development effort. Converted Figma designs/ mock-ups into fully functioning UIs very fast.
- Extensive interaction with project managers on requirements gathering and estimation on Spring planning and user stories tracked in JIRA. Took lead to guide the team on implementing the frontend technologies and collaborated with Java.
- Developed the test cases in React Testing Library to maintain code quality.

Frontend Engineer

12/2020 to 05/2021

Videolevels

Tallinn, Estonia

- Developed and designed UI for Elisa stage for registration and streaming live and pre-recorded videos using NextJs, Javascript, HTML5, and CSS.
- Development and continuous integration of the company's existing products using Javascript, Typescript, React, GraphQL and SQL.
- Participated in team meetings with the onsite team and corporate clients to understand the needs of the new implementation. participated in daily team meetings and scrum meetings.

Frontend Developer

06/2018 to 12/2020

BD Electronics

Gzira, Malta

- Helped transition the AngularJS back office application. Initiated and facilitate the transition from Angular to React.
- Wrote batch jobs that run on Linux servers to upload the batch product to the database for e-commerce websites.
- Handled a few projects as a single Frontend developer and helped in merging designs and application code.
